PAGE 1

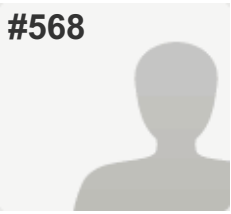

**Q1: If additional road and bridge funding could be secured for your home county, what would you list as the top priority project(s)? List up to three.**

Project 1

The intersection of AL. Hwy 51 and Lee Road 400 & 042 needs something. There are many wrecks there. The state just put a turning lane there, but it is still dangerous. I think there needs to be a red light or caution light to warn people of this stretch of road starting at the top of hill on Hwy 51 to Beauregard HS. The speed limit is 55 and sometimes the area is really congested. A person not familiar with this area will be at risk for accidents. A very bad accident involving a car crash catching fire happened this past summer in front of the Dollar General on AL Hwy 51. The new road work is nice, but I think something still needs to be done to make the area safer. Reduce the speed limit or put up caution light, etc.

Project 2

AL. Hwy 51 and Gateway Drive. A red light could be very useful there. It is almost impossible to make a left turn onto AL. Hwy 51 from Gateway. There have been a few accidents there, as well.

Project 3

Marvyn Parkway (AL. Hwy 51) at the intersection of AL. Hwy 169. There have been many wrecks right there involving people trying to make a left turn onto Marvyn Parkway. There needs to be something done right there. It is dangerous and sometimes impossible to make that turn.

PAGE 1

**Q1: If additional road and bridge funding could be secured for your home county, what would you list as the top priority project(s)? List up to three.**

Project 1

The bridge in Fayetteville Alabama on CR 008. Close to the High School. At the current rating of 15 Tons the fuel trucks, delivery trucks, fire department trucks, etc cannot legally cross the bridge to deliver to the local stores and schools. And the fire department cannot legally cross the bridge to get to a fire to save someone or someones residence. Plus if two of the school buses were on the bridge as they have been in the past, this could cause reason for concern for the safety of the children, or if another large vehicle coming from the opposite direction met the school bus on the bridge, this would be concerning as well.

Project 2

The Camp Brownie road shoulders are 6" to 8" below the pavement were the road meets the shoulder. Causing vehicles to scrape if the run off the road.
